<u>Wireless access instructions OpenCayuga</u> (Auburn Campus Only)

Updated – 3/1/2011

Windows XP

To set up your Windows XP or Windows 2000 laptop to access the OpenCayuga wireless network:

- 1. Double-click the Wireless icon usually located in the bottom right hand corner of your screen.
- 2. The Wireless Network Connection window displays for you to choose a wireless network. It will look something like the picture below. It should say "**OpenCayuga**" as the SSID name:

- 3. You may see several SSID's in the list. Select **"OpenCayuga"** from the list then select the **Connect** button.
- 4. A warning dialog may display the message: "You are connecting to an unsecured network." Select the **Connect Anyway** button as shown below:

- 5. Close the **Choose a wireless network** window by selecting the red X in the upper right-hand corner.
- 6. Open a web browser, for example, Internet Explorer or Mozilla Firefox. You may now navigate on the Internet freely.

If you still have trouble please contact Cayuga Community College technical support.

Windows Vista and Windows 7

To set up your Windows Vista or Windows 7 laptop to access the OpenCayuga wireless network:

1. Double-click the Wireless icon usually located in the bottom right hand corner of your screen.

- 2. The **Wireless networks are available** window displays and indicates that you are Not Currently Connected to a wireless network.
- 3. Select **Connect to a network**:

4. The Connect to a Network dialog displays:

Show All	•	4
📑 csun	Unsecured network	llee
-49		111

- 5. You may see several SSID's in the list. Select **"OpenCayuga"** from the list of available SSID's and then select the **Connect** button.
- 6. A warning dialog window displays the message **"OpenCayuga" is an unsecured network**:

- 7. Select the **Connect Anyway** option
- 8. The Connect to a network window displays the message successfully connected.

- 9. If asked to save the network for future use select the **Save this Network** check box then select the **Close** button. This will allow you to connect to the network automatically the next time you visit Cayuga Community College.
- 10. The Set Network Location window displays:

- 11. Select the **Public Location** option.
- 12. Open a web browser, for example, Internet Explorer or Mozilla Firefox. You may now navigate on the Internet freely.

If you still have trouble please contact Cayuga Community College technical support.

<u>Macintosh OS X 10.3 – 10.6</u>

To set up your Apple Macintosh laptop to access the OpenCayuga wireless network:

- 1. Select the Airport icon on your Menu Bar at the top right-corner of your screen.
- 2. Select **"OpenCayuga"** from the list of available SSID's:

3. Open a web browser, for example, Safari or Mozilla Firefox. You may now navigate on the Internet freely.

If you still have trouble please contact Cayuga Community College technical support.
